Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

A. Claims 1-11 and 14-17, are drawn to a servo device and optical pickup for detecting sub-beams etc., classified in Class 369, subclass 44.37.

B. Claims 12-13 are drawn to a method for detecting intensity distribution and comparing intensity signal, classified in Class 369, subclass 44.25.

Inventions B and A are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used for tracking control.

Because these inventions are distinct for the reasons given above and the search required for Group [1] is not required for Group [2], restriction for the examination purposes as indicated is proper.

2. A telephone call was made to Mr. Jerald Nagae on December 19, 2006; to request an oral election to the above restriction requirement, but did not result in an election being made.

NOTE: Mr. Nagae requested that a formal restriction be sent out for examination of the client.

3. A shortened statutory period for response to this action is set to expire 1 (one) months and 0 (zero) days from the mail date of this letter. Failure to respond within the period for response will result in ABANDONMENT of the application (see 35 U.S.C. 133, M.P.E.P. 710.02, 710.02(b)).
